

TASMANIA'S COVID-19

VACCINE PROGRAM IS HERE

The vaccine is safe, effective and free.

Tasmania's vaccinations will begin 23 February. Vaccinating everyone will take time so vaccines will be delivered in phases. Those at greatest risk of exposure or likely to experience serious illness due to COVID-19 will be vaccinated first.

PHASE 1A

Workers in this group will be contacted directly about vaccination

Border security and quarantine staff (e.g. police, security and hotel staff working in quarantine hotels)

Frontline health staff at higher risk (e.g. key emergency, ICU, vaccination, testing and ambulance staff)

Residents and staff at aged and disability residential care facilities *

* *The Australian Government will manage these vaccinations*

PHASE 1B

People aged 70+ years

Other health care workers

All Aboriginal and Torres Strait Islander people aged 18+ years

Adults with underlying medical conditions

Critical and high-risk workers including defence, police, fire, emergency services and meat processing

PHASE 2B

Remaining Tasmanians aged 18+ years

PHASE 2A

People aged between 50-69 years

Other critical and high-risk workers

Phase 3: Tasmanian children if clinically recommended and approved.

The vaccine is an important safeguard to protect you, your family and your community.
